Colorado Springs, Colo.

The growth of the Telephone Business in Colorado last year could well mean more to you and your family than you realize.

For example:

Our 8,400 employees in Colorado earned \$50,000,000 in wages which were spent largely in the state. If you're a merchant in one of the communities we serve, our employees probably did business with you.

The Company's state and local tax bill in Colorado last year was over \$10,000,000. You're enjoying the effects of this money in better streets and highways, schools and other governmental services.

Our Company and Western Electric both buy goods and services from many local suppliers. In the eight-state area served by our Company, these expenditures average \$100,000,000 a year. If you work for one of our local suppliers, we, in effect, did business with you.

Our plans for 1964 call for a construction program totaling about \$49,300,000. As we pace Colorado's population growth, we'll also be working hard to improve the telephone service you already have.

Growth and Improvement.

Our Biggest Jobs.

W. V. Harding & Sons

WERE PUTTING UP A NEW SAWMILL in the Hollow to help make the charcoal that mellows our Tennessee sippin' whiskey.

Jack Daniel's is still smoothed out with Charcoal Mellowing. That calls for seeping every drop down through 10 feet of charcoal made from hard maple, sawed up and rick-burned in the open air. And we've been doing it so long now our old sawmill is on its last legs. But you can be sure we'll keep on gentling our whiskey this ancient Tennessee way. Our old-timers like the chief sawyer here will see to that.

One of these German made precision weather instruments

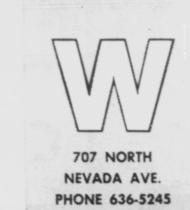

BAROMETER

A fine weather instrument custom made for our mile-high altitude. No adjustments are required. The attractive white enamelled dial and raised glass face are framed in brass... set off by a walnut finished wood casing and a brass hanging ring. The open center dial has a set hand and knob. Choose this aneroid barometer or the round dial thermometer.

A precision made dial thermometer created by skilled craftsmen in Schwenningen, West Germany. 31/8" in diameter. The 244" diameter white enamelled face has scientific calibration marks in black and gold. The wood casing has a polished walnut finish and brass bezel. You have your choice between this smart looking thermometer or the barometer.

FREE...Just for saving

You may select either the barometer or the thermometer when you add to your existing Western Federal Savings account or open a new savings account of \$500 or more at any of the six convenient offices. Your savings earn the good return of 41/4% on the full amount, your account is insured by the agency of the U. S. Government and your funds are readily available. Start saving now where it pays and has paid for 73 consecutive years ... and where you can choose between these two scientific weather instruments as your 73rd Anniversary gift for thrift.
